

# YEA CPD Series 2021

The YEA CPD series has been put together exclusively by young engineers for young engineers and is designed to support you on your career journey into the professional world.

The aim of the YEA CPD series is to provide educational content that bridges the gap between what you learn at university and what you need to know in the workplace by delivering learning opportunities that you can practically apply on the job.

## The YEA CPD Series consists of the following:

### CPD webinars

The CPD webinar topics have been designed to help highlight and gain an understanding of the unique issues, trends and challenges faced by young engineers in the workplace as they start their career journey. There will be one CPD webinar scheduled each month and recordings of past webinars will be available exclusively on EA OnDemand.

### Tech Talks

The Tech Talk series provides the opportunity for early career engineers to gain an overview and understanding of the various technology platforms and solutions that are currently in use by the industry. There will be one Tech Talk webinar scheduled each month and recordings of past webinars will be available exclusively on EA OnDemand.

### Video Snippet Series

Available exclusively on EA OnDemand, these short 5-minute videos are designed as additional learning opportunities that will complement the topics covered in the CPD webinars.

# Webinar Calendar

Month	CPD Webinar Topic	Tech Talk Topic
Nov	More Than Just The Facts: The Essential Guide to Communicating Technical Topics to Non-Technical People Presented by Chris Huet, Founder, Understood
